BUTTON

CONTRADOL MOTOR

- MEDICAL BED
- More than just resting
- You can get comfortable just by pressing a button (at any time your body will be in the correct position)
- Spend some quality time in your bed

An innovative bed base that will release and even eliminate many different health problems. It was invented with the help of well-known Slovenian medical doctor, who has many years of experience on how to release the pain in our bodies. Because of its unique adaptation in the upper and lower part of the body (the only bed base like this on the market), this bed base offers you 99,99% adaptation to your needs and helps you remove an unpleasant feeling during sleep. By pressing a button, you can simply change the inclination of the upper and lower part of the body. With adjustment like that, your neck, thoracic and lumbar-cross section of the spine will be relieved.

**EASY AND
COMFORTABLE
SLEEP**
